EXPERIENCE

Extreme Networks, Salem NH   **October 2019 – November 2020**
Senior Web Designer
- Administered two independent learning platforms built with WordPress and LearnDash
- Instrumental in the transitioning of the development from an outside agency to an in-house team
- Developed WordPress plugins enabling users to update profile information and allow management to export data in CSV format for better reporting
- Enforced a web ops workflow ensuring that code was tested prior to and at deployment utilizing the Pantheon hosting platform
- Created and deployed python and shell scripts along with server cron jobs to reduce or eliminate manual processes

St. Mark's Lodge, Derry NH   **March 2012 – Current**
Webmaster
- Role includes all aspects of website administration of https://stmarkslodge.org, including WordPress updates and backups
- Custom theme and page layouts utilizing HTML, CSS, and PHP
- Accept, curate, and create content for the website as needed

New Hampshire DeMolay   **June 2017 – June 2019**
Webmaster
- Primary point of contact for materials to be posted to the New Hampshire DeMolay website (https://nhdemolay.org)
- Created and updated graphics and photographs for inclusion on the site
- Maintain up-to-date email addressing and aliases for State Officers, Executive Management Team, and Senior Staff

ARRIS (formerly Motorola Mobility), Lowell MA   **July 2009 – March 2018**

Professional Content Developer (April 2013 – March 2018)
- Delivered the first ARRIS branded test based certification leading to a higher visibility of the product line and better trained staff and customers.
- Provided support for numerous projects including the shift from Google services to Microsoft products, and the migration of materials to new tools and formats
- Attended core team cross functional meetings to enable working with engineering, marketing, and program management

Professional Content Developer / Project Manager   **August 2011 – April 2013**
- Created, obtained management approval of, and tracked through AtTask (now Workfront) project plans for both development and non-development projects

- Provided training and support for the AtTask project management system, and the migration to Google services including the internal document storage system
- Represented interests of both the training and documentation functions at cross functional core team meetings

Training Department Manager   **July 2009 – August 2011**
- Managed a team of developers and instructors including development and delivery schedules
- Negotiating training delivery for both internal and external audiences
- Oversaw move of primary training lab between two corporate locations
